

# TDI INTRO TO TECH INSTRUCTOR

The TDI Intro to Tech Instructor course provides the training required to competently and safely introduce students to the world of technical diving.

The objective of this course is to train instructors to familiarize students with technical equipment configurations, to enhance open water diving skills (such as buoyancy, trim, and situational awareness), and to introduce advanced gas planning techniques within a no-decompression context.

Although taught in conjunction with material from the TDI Advanced Nitrox and Decompression Procedures courses, this course is strictly a no-decompression course; students are permitted to use enriched air nitrox mixes, provided the gas mix is within their current level of certification.

## Qualifications of Graduates

Upon successful completion of the course, graduates may teach diving activities in a technical equipment configuration provided:

1. The diving activities approximate those of training
2. The areas of activities and environmental conditions approximate those of training

Graduates who are also nitrox instructors may enroll in:

1. TDI Advanced Nitrox Instructor course
2. TDI Decompression Procedures Instructor course

## Instructor Candidate Prerequisites

1. Certified as an SDI Open Water Scuba Diver Instructor, or equivalent
  2. Certified as a Advanced Nitrox and Deco Procedures diver, or equivalent
- OR
1. Certified as a TDI Advanced Nitrox and Deco Procedures Instructor, or equivalent

## Duration

3 days
