

TDI SIDEMOUNT INSTRUCTOR

This course is designed to train instructors to teach certified divers how to safely utilize side-mounted primary cylinders as an alternative to the traditional back-mounted configuration.

Qualifications of Graduates

Upon successful completion of the course, graduates may teach diving activities in a sidemount equipment configuration provided:

1. The diving activities approximate those of training
2. The areas of activities and environmental conditions approximate those of training

Graduates who are also nitrox instructors may enroll in:

1. TDI Advanced Nitrox Instructor course
2. TDI Decompression Procedures Instructor course

Instructor Candidate Prerequisites

1. Certified as an SDI Open Water Instructor or equivalent
2. Certified as a TDI Sidemount Diver or equivalent

Duration

3 days
